PROJECTS

Title : HealthCare Management System (Health Plus)

Duration : 5 months

Description : Healthcare management system is a virtual healthcare that means online patient care and this system is web-base. This system is designed for a single clinic/ health test laboratory, which is have many branches. But each branch is connected with a only one system. Here users can login and booked appointments for their required medical tests. For getting an appointment at first user need to login at this site, if user are not registered already. Users can get location about other nearest branch of clinic from here and booked appointment from their nearest clinic branch . The benefits that can be found in this system are : different type of test like -Blood test, X-ray, USG, ECG, BP, sugar etc. Doctors check up and Blood Bank services also available in this system. So users can make appointment for whatever they want from our system.

Title : Online Psychological Counseling System

Duration : 5 months

Description : The proposed online psychological counseling system, developed using Laravel, offers users a confidential platform to assess their mental well-being through established psychological theories like the Likert Scale. Upon completing the assessment, the system intelligently determines the need for counseling. Users are then presented with acuratedlist of qualified psychologists for appointment booking. To streamline the process, advance payment for appointments is integrated. This user-friendly and secure platform aims to provide accessible mental health support, leveraging technology to bridge gaps in psychological well-being assessment and counseling services.
